Issue Date
1/25/2018

At the end of each month a snapshot of certain fields are saved for report Purposes. This data is used for turns calculation and by end users looking for trends in inventory utilization. This data can be reported on using the bucket report on the inventory stock Status report. For example you could run a report to see the inventory value on Dec 31, 2017 Using avg cost, net cost or whatever ending column you like.

Contact Dataware for more Information regarding our inventory buckets.
