Issue Date
2/22/2018

Catalog Price Matrix allows for imports to set price based On a pricing matrix. Assign a multiplier to any of the available columns and sell price will be calculated per cost and multiplier.

For example if you set the multiplier for Customer A and MFG B at 1.10 then any item for that MFG will use a multiplier Of 1.1*cost to set the sell price.

- Fixed bug on Correct receipt regarding multiplier
- Added Lead Time Days to Branch Stock Status
- Added Lead Time Days to Inventory Stock Status
- Created a Price Matrix System for Customer Pricing
- Fixed bugs in Repair system
