322

Issue Date
3/1/2018

Pricing for Consigned material can now be changed to use Average Cost for all Usage transactions. Until now the Usage cost was stamped with the Inventory Unit Cost. If a sell multiplier was also set in inventory then the sell price for The transaction would be calculated using unit cost * multiplier to establish a Billing Price to the customer.

Using the Average cost instead of the Unit cost may be a user preference. A customer switch can be turned on the change this billing process.
