

# VMI

## VENDOR MANAGED INVENTORY

Project  
Update  
# 557

Issue Date  
6/9/2023

- I3 allows third party software packages to access our FTP folders
- and the data with a password protected token.
- You can set up Excel spreadsheets to pull in data from your folder.
- You can also use other third part applications to access your data
- without manually doing an FTP interface.

Contact Dataware for more  
Information regarding these  
product changes.
